Abstract

Information on corporate social responsibility have become important and required in the law made by companies, especially mining companies, because it involves the welfare of employees, communities and the environment around the company. The purpose of this thesis is to investigate the effect of institutional ownership, foreign ownership of profitability, leverage, and firm age on the disclosure of corporate social responsibility in mining companies listed on the Indonesian Stock Exchange. Data collection methods used in this study is the method of documentation and literature obtained at the library, the official website BEI, the company's official website, and literature data collected in the form of concepts and theories that can be used for this study derived from books, documents, journals, and so forth.

The test results showed partial institutional ownership variables, firm age, and leverage significant effect on the disclosure of Corporate Social Responsibility in mining companies in Indonesia Stock Exchange (BEI). And to test partially indicates the profitability variables and foreign ownership has no effect on the disclosure of Corporate Social Responsibility in mining companies in Indonesia Stock Exchange.

The results of regression testing is jointly demonstrate the influence of institutional ownership variables, firm age, profitability, leverage, and foreign ownership on the disclosure of Corporate Social Responsibility in mining companies in Indonesia Stock Exchange.

Keywords: *institutional ownership, firm age, profitability, leverage, and Corporate Social Responsibility*
