HALAMAN PENGESAHAN PEMBIMBING ........................................... ii
HALAMAN PENGESAHAN PENGUJI ................................................ iii
ABSTRAKSI ................................................................................ iv
KATA PENGANTAR ...................................................................... v
DAFTAR ISI ................................................................................ vi
DAFTAR TABEL ........................................................................... vii
DAFTAR GAMBAR ....................................................................... ix
DAFTAR GRAFIK ......................................................................... xi

BAB I PENDAHULUAN .................................................................. 12
1.1 Latar Belakang Masalah ...................................................... 12
1.2 Perumusan Masalah ............................................................ 14
1.3 Batasan Masalah .................................................................. 14
1.5 Manfaat Penelitian .............................................................. 15
1.6 Metodologi Penelitian .......................................................... 15

BAB II TINJAUAN PUSTAKA .................................................... 17
2.1 Robot ................................................................................. 17
2.1.1 Robot Humanoid UPN "Veteran" Yogyakarta ...................... 17
2.1.2 Robot Humanoid Darwin-OP ............................................ 19
2.1.3 Sistem Kendali Autonomous Robot ................................. 22
2.2 Deteksi Warna ................................................................. 23
2.3 Intensitas Cahaya ............................................................... 23
2.4 Exposure ............................................................................. 25
2.5 State Of The Art ................................................................. 25

BAB III METODOLOGI PENELITIAN DAN PERANCANGAN .... 29
3.1 Metodologi Penelitian ........................................................ 29
3.2 Analisis Masalah ............................................................... 31
3.3 Identifikasi Masalah ........................................................... 40
3.4 Analisis Kebutuhan ............................................................ 40
3.5 Perancangan ...................................................................... 41
3.5.1 Perancangan Komunikasi Perangkat ............................... 41
3.5.2 Perancangan Struktur Tubuh .......................................... 48
3.5.3 Perancangan Sistem Ketahanan Sistem Visi .................... 53
3.5.4 Perancangan Pengujian .................................................. 54
3.5.4.1 Perancangan Pengujian Sistem Kendali Autonomous .... 54
3.5.4.2 Perancangan Pengujian Ketahanan Sistem Visi ............ 56

BAB IV HASIL DAN PEMBAHASAN .................................... 59
4.1 Pengujian Sistem Kendali Autonomous .............................. 59
4.1.2 Pengujian Framework ..................................................... 60
4.1.3 Pengujian Sensor Keseimbangan ................................. 62
4.1.4 Pengujian Sistem Visi ..................................................... 63
4.2 Pembuatan Ketahanan Sistem Visi .......................................................... 64
4.2.1 Pembuatan Rumus .............................................................................. 65
4.2.2 Penulisan Program ........................................................................... 67
4.3 Pengujiw Deteksi Warna ................................................................. 68
4.3.1 Pengujiw Deteksi Warna Tanpa Menggunakan Ketahanan Sistem Visi 69
4.3.2 Pengujiw Deteksi Warna Dengan Ketahanan Sistem Visi ............ 71
4.3.3 Hasil Pengujiw Deteksi Warna Pada Sistem Visi ......................... 73
4.4 Keterbatasan Sistem .......................................................................... 75
BAB V PENUTUP ....................................................................................... 77
5.1 Kesimpulan ....................................................................................... 77
5.2 Saran ................................................................................................ 79
