DAFTAR GAMBAR ........................................................................ vii
DAFTAR TABEL ........................................................................ viii
INTISARI ......................................................................................... ix

BAB I PENDAHULUAN ............................................................... 1
A. Latar Belakang ................................................................................. 1
B. Prospek Pasar .................................................................................. 2
C. Tinjauan Pustaka ........................................................................... 3

BAB II PROSES PRODUKSI .......................................................... 6
A. Spesifikasi Bahan Baku dan Produk .................................................. 6
B. Uraian Proses .................................................................................. 8
C. Diagram Alir Kuantitatif dan Kualitatif .............................................. 10
D. Tata Letak Alat dan Pabrik ............................................................... 12
E. Spesifikasi Alat ............................................................................... 17

BAB III NERACA MASSA DAN NERACA PANAS ......................... 24
A. Neraca Massa ................................................................................ 24
B. Neraca Panas ............................................................................... 35

BAB IV UTILITAS ......................................................................... 38
A. Kebutuhan Air ............................................................................... 38
B. Kebutuhan Steam .......................................................................... 38
C. Kebutuhan Listrik .......................................................................... 39
D. Kebutuhan Bahan Bakar ................................................................. 39
E. Kebutuhan Udara Tekan................................................................. 39

BAB V MANAJEMEN PERUSAHAAN ................................................. 41
A. Bentuk Badan Usaha................................................................. 41
B. Struktur Organisasi................................................................. 41
C. Jadwal Kerja Karyawan.......................................................... 42
D. Jumlah Tenaga Kerja............................................................... 45
E. Sistem Penggajian Karyawan.................................................. 46

BAB VI EVALUASI EKONOMI ...................................................... 49
A. Investasi Modal ................................................................. 49
B. Biaya Produksi ................................................................. 49
C. Harga Jual Produk .............................................................. 50
D. Analisa Keuntungan ............................................................ 50
E. Analisa Kelayakan .............................................................. 51

BAB VII KESIMPULAN ............................................................... 54

DAFTAR PUSTAKA ................................................................. 56
