ABSTRACT .................................................................................................................... xiv

I. PENDAHULUAN ........................................................................................................ 1
  1.1. Latar Belakang .................................................................................................... 1
      1.1.1. Rumusan Masalah .................................................................................... 2
      1.1.2. Keaslian Penelitian ................................................................................ 3
  1.2. Maksud, Tujuan dan Manfaat Penelitian .......................................................... 7
      1.2.1. Maksud Penelitian .................................................................................. 7
      1.2.2. Tujuan Penelitian .................................................................................... 7
      1.2.3. Manfaat Penelitian ................................................................................... 7
  1.3. Peraturan Perundang – undangan ................................................................. 7
  1.4. Tinjauan Pustaka ............................................................................................ 9
      1.4.1. Pertambangan Minyak Tradisional Sumur Tua Wonocolo ................. 9
      1.4.2. Kondisi Geologis Wonocolo .................................................................. 9
      1.4.3. Sejarah Pembentukan Minyak Bumi di Wonocolo ......................... 10
      1.4.4. Material .................................................................................................... 11
      1.4.5. Adsorpsi .................................................................................................. 12
      1.1.1. Zeolit ....................................................................................................... 13
      1.4.7. Airtanah ................................................................................................... 20
  1.5. Lingkup Daerah Penelitian .............................................................................. 30
      1.5.1. Lokasi, Letak administrasi, luas dan kesampaian ......................... 30
II. RUANG LINGKUP PENELITIAN ......................................................... 34
2.1. Lingkup Kegiatan Penelitian .................................................. 34
   2.1.1. Jenis Kegiatan Penelitian .................................................. 34
   2.1.2. Komponen Lingkungan ..................................................... 35
III. CARA PENELITIAN ........................................................................ 38
3.1. Jenis Metode Penelitian dan Parameter yang digunakan ............ 38
   3.1.1. Metode survey dan pemetaan .............................................. 38
   3.1.2. Metode Wawancara ............................................................ 38
   3.1.3. Metode Sampling ............................................................... 39
   3.1.4. Metode Laboratorium ......................................................... 39
3.2. Teknik Sampling dan Penentuan Lokasi Sampling ...................... 40
3.3. Perlengkapan Penelitian ........................................................... 40
3.4. Tahapan Penelitian ................................................................. 41
   3.4.1. Tahap Persiapan ............................................................... 43
   3.4.2. Tahap Kerja Lapangan ....................................................... 45
   3.4.3. Tahap Kerja Laboratorium dan Studio ................................ 49
   3.4.4. Kerja Untuk Sajian Evaluasi Hasil Penelitian (Pasca Lapangan) .... 56
IV. RONA LINGKUNGAN .................................................................... 62
4.1. Komponen Geofisik – Kimia ..................................................... 62
   4.1.1. Iklim ................................................................................. 62
      4.1.1.1. Curah Hujan ................................................................. 62
   4.1.2. Bentuk Lahan ................................................................. 64
   4.1.3. Tanah ............................................................................. 68
   4.1.4. Satuan Batuan ............................................................... 70
   4.1.5. Tata Air ......................................................................... 75
      4.1.5.1. Parameter Fisik ......................................................... 77
      4.1.5.2. Parameter Kimia ....................................................... 78
   4.1.6. Bencana Alam ............................................................... 82
4.2. Komponen Biotis .................................................................... 83
   4.2.1. Flora ............................................................................. 83
   4.2.2. Fauna ............................................................................ 84
4.3. Sosial ...................................................................................... 85
   4.3.1. Demografi ................................................................. 86
4.3.2. Sosial Ekonomi ................................................................. 86
4.3.3. Sosial Budaya................................................................. 88
4.3.4. Kondisi Fasilitas Umum................................................. 89
4.4. Kesehatan Masyarakat ....................................................... 91
4.5. Penggunaan Lahan ............................................................. 92

V. EVALUASI HASIL PENELITIAN ................................................. 96
5.1. Analisis Iklim dan Curah Hujan ........................................... 96
5.2. Evaluasi Lapisan Pembawa Air ............................................ 97
5.3. Evaluasi Kualitas Airtanah .................................................. 98
  5.3.1. Evaluasi Kualitas Airtanah Berdasarkan Parameter Fisik .......... 98
  5.3.1.1. Total Dissolved Solid (TDS) ........................................ 98
  5.3.1.2. Daya Hantar Listrik (DHL) ........................................ 100
5.2.2. Evaluasi Kualitas Airtanah Berdasarkan Parameter Kimia ....... 101
  5.2.2.1. Potential Hydrogen (pH) ........................................... 101
  5.2.2.2. Khlorida (Cl) .............................................................. 102
  5.2.2.3. Natrium (Na) ............................................................ 103
  5.2.2.4. Kesadahan Sebagai CaCO₃ ......................................... 104
  5.2.2.5. Magnesium (Mg) ..................................................... 105
  5.2.2.6. Calsium (Ca) ............................................................ 106
5.3. Analisis Karakteristik Zeolit Berdasarkan Kandungan Si & Al ...... 107
5.4. Pengelolaan Airtanah dengan Media Zeolit Alam ....................... 111
  5.4.1. Tahapan Persiapan Material Zeolit Alam .......................... 111
  5.4.2. Tahapan Filter Airtanah dengan Zeolit Alam ....................... 113
  5.4.3. Evaluasi Efektifitas Hasil Filter ...................................... 118
5.5. Kebutuhan Air Domestik Warga .......................................... 124

VI. ARAHAN PENGELOLAAN ......................................................... 125
6.1. Pendekatan Teknologi ....................................................... 125
6.2. Pendekatan Sosial Ekonomi ............................................... 129
6.3. Pendekatan Institusi .......................................................... 129

VII. KESIMPULAN DAN SARAN .................................................. 131
7.1. Kesimpulan ........................................................................ 131
7.2. Saran .................................................................................. 132
