## BAB

### I. PENDAHULUAN

1. Latar Belakang ........................................ 1
2. Permasalahan ........................................ 2
3. Tujuan Penelitian ..................................... 2
4. Batasan Masalah ....................................... 2
5. Metodologi Penelitian ................................ 3
6. Diagram Alir Penelitian ............................... 4
7. Manfaat Penelitian .................................... 4

### II. TINJAUAN UMUM

1. Lokasi Kesampaian Daerah ........................... 5
2. Curah Hujan ........................................... 6
3. Keadaan Geologi ........................................ 6
4. Kegiatan Penambangan ............................... 12

### III. DASAR TEORI

1. Faktor-faktor yang Mempengaruhi Longsor Pada Lereng .................................................. 15
2. Pendekatan Faktor Keamanan ........................ 18
3. Pendekatan Probabilitas ............................... 19
4. Kriteria Keruntuhan *Mohr – Coulomb* ............. 20
5. Kriteria Keruntuhan *Generalized Hoek-Brown* .. 22
6. *Geological Strength Index* (GSI) .................... 26
3.8. Analisis Stabilitas Lereng Dengan Metode Kesetimbangan Batas ........................................ 29
3.9. Metode Perhitungan Probabilitas Longsoran .......... 43

IV. HASIL PENELITIAN ................................................................. 48
4.1. Penyelidikan Lokasi Penelitian ......................... 48
4.2. Geometri Lereng ............................................................... 50
4.3. Nilai Konstanta Mi ............................................................. 51
4.4. Penentuan Domain ............................................................. 51
4.5. Nilai Geological Strength Index (GSI) ................. 53
4.6. Tahapan Permodelan Slide v.7.0 ......................... 54

V. PEMBAHASAN ................................................................. 61
5.1. Faktor Yang Berpengaruh Terhadap Stabilitas Lereng .................................................... 61
5.2. Analisis Kestabilan Lereng ................................. 62

VI. KESIMPULAN DAN SARAN ............................... 65
6.1. Kesimpulan ................................................................. 65
6.2. Saran ................................................................. 65

DAFTAR PUSTAKA ............................................................. 66

LAMPIRAN .................................................................
