The 8th International Conference on Membrane Science and Technology

Optimization of CO ₂ /CH ₄ Ideal Selectivity by Carbon Molecular Sieve Membranes Derived from Polyetherimide Using Response Surface Methodology A-24 Surface Modification of Polyacrylonitrile Membrane with Inorganic Particles for Ultrafiltration Application A-25 Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two-step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 44 A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane for Hydrogen Fueled Proton Exchange Membrane Fuel Cells	Membrane N-23	
Derived from Polyetherimide Using Response Surface Methodology A-24 Surface Modification of Polyacrylonitrile Membrane with Inorganic Particles for Ultrafiltration Application A-25 Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two-step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 45 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	Optimization of CO ₂ /CH ₄ Ideal Selectivity by Carbon Molecular Sieve Membranes	36
Surface Modification of Polyacrylonitrile Membrane with Inorganic Particles for Ultrafiltration Application A-25 Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 45 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane		
Surface Modification of Polyacrylonitrile Membrane with Inorganic Particles for Ultrafiltration Application A-25 Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two-step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 45 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	A-24	
Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane		37
Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties A-26 Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two-step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	1-25	20
Influence of Dope Extrusion Rate (DER) to Polyethersulfone Hollow Fiber Membranes Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 44 A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	Membrane Surface Modification for Anti-Adhesion and Anti-Bacterial Properties	39
Added With Surface Modifying Macromolecules (SMM) A-27 Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two-step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	1-26	
Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane		40
Surface Properties Effects on Filtration Performance of PVDF Composite Hollow Fiber Membrane A-28 Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 44 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	X-27	
Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane 44 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane		41
Is Single-step Radiation Grafting Method Better Than Its Counterpart Conventional Two- step Method in Preparation of Proton Exchange Membranes for Fuel Cell? A-29 Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X- Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	1-28	
Study of Crystallinity and Phase Behavior of PVDF-GPPS Blends Membranes from X-Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane		42
Ray Diffractometry and Fourier Transform Infra Red Spectroscopy (In Atr Mode) A-30 High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane 45	1-29	
High performance flat sheet NF type forward osmosis membrane A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane 45		43
A-31 Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane 45	1-30	11
Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane 45	ligh performance flat sheet NF type forward osmosis membrane	44
Influence of Silica/Sulfonated Polyether-Ether Ketone as Polymer Electrolyte Membrane	A-31	
		45

Nanocomposite Electrolyte Membrane for Moderate Temperature and Low Relative Humidity Hydrogen Proton Exchange Membrane Fuel Cell (hpemfc) Application
