

The 8th International Conference on Membrane Science and Technology

List of Content

	Page
<hr/> A. MEMBRANE PREPARATION <hr/>	
A-1	
The Effect of Functionalization Carbon Nanotubes (CNTs) as a Composite Material for Membrane Application	14
<hr/>	
A-2	
The Effect Of Added Plasticizer Compound Dibutyl Phtalat To Mechanically Nature And Cellulose Diasetate Membrane Performance From Pineapple Leaf Fiber (<i>Ananas Comosus</i>)	15
<hr/>	
A- 3	
Effect of Dope Extrusion rate (DER) in Spinning Process of Hollow Fiber Membrane for Ultrafiltration Using CFD	16
<hr/>	
A-4	
Perfluorosulphonated Composite Membranes for the Direct Ethanol Fuel Cell Working at Higher Temperature (>100°C)	17
<hr/>	
A-5	
PVA/XSBR Blending For Desalination of Aqueous Salt Solutions	18
<hr/>	
A-6	
The Effect of Dispersion State of Cloisite 15A [®] on the Performance Properties of SPEEK/Cloisite15A [®] /TAP Nanocomposite Membrane for DMFC Application	19
<hr/>	
A-7	
In-situ Synthesis of Cubic Silver Nanoparticles in Polyethersulfone for Antibacterial UF Membrane	20
<hr/>	
A-8	
Carbon Hollow Fiber Membrane Fabrication from Polyetherimide/Polyvinylpyrrolidone (PEI/PVP) for Gas Separation	21
<hr/>	
A-9	
Polyfurfuryl Alcohol Based Carbon Molecular Sieve Membranes: Effect of Carbonization Temperature on CO ₂ /CH ₄ Selectivity	22
<hr/>	
A-10	
Application of Response Surface Methodology for Optimization of Carbon Molecular Sieve Membrane Synthesis from Polyfurfuryl Alcohol for O ₂ /N ₂ Selectivity	23
<hr/>	
	Page
<hr/>	
A-11	24
