BAB I. PENDAHULUAN .................................................................1

1.1. Latar Belakang .................................................................1
1.2. Maksud dan tujuan .........................................................1
1.3. Metodeologi ........................................................................2
1.4. Sistem Penulisan ...............................................................3

BAB II. TINJAUAN UMUM LAPANGAN ..............................................4

2.1. Letak Geografis Lapangan “FL” ............................................4
2.2. Kondisi Geologi .................................................................4
   2.2.1. Geologi Regional .........................................................4
   2.2.2. Stratigrafi Lapangan “FL” .............................................6
   2.2.3. Struktur Lapangan “FL” ................................................8
2.3. Kondisi Lapangan “FL” .......................................................8
   2.3.1. Reservoir Target .........................................................8
   2.3.2. Sejarah Lapangan Gas “FL” .........................................8

BAB III. TEORI DASAR .................................................................10

3.1. Klasifikasi Reservoir Gas ....................................................11
   3.1.1. Reservoir Gas Kering ...............................................11
   3.1.1. Reservoir Gas Basah .................................................11
   3.1.2. Reservoir Gas kondensat ..........................................12
   3.1.3. Konstruksi Diagram Fasa dengan Software PVT-i ..........14
3.2. Perhitungan Jumlah Gas Mula-mula (OGIP) secara Volumetrik ....15
3.3. Perhitungan Cadangan Sisa .................................................16
   3.3.1. Perkiraan Tekanan Abandon ......................................17
   3.3.1.1. Aliran Gas Dalam Pipa ........................................18
