

## **ABSTRACT**

*Energy is one of important issues which monitored by Indonesia Government. Today, Indonesia is expanding as a big energy market in Asia. International Energy Agency (IEA) is an international energy forum responds to energy policy. It has purpose to maintain and improve the major oil supply disruptions. Indonesia is one of members in IEA. They have the same perspectives to deal with global energy issues and find out solution of energy security. In addition, it can improve the relation with same developed countries that create their renewable energy technology. There is a big investment opportunity for Indonesia to manage its renewable energy which has not explore yet. Finally, the analysis done by IEA experts can be used by Indonesia to improve its energy policy.*

*Keywords: IEA, Energy Security, renewable energy, Indonesia Energy Policy, energy issues.*
