KATA PENGANTAR ............................................................................................... vii
DAFTAR ISI .............................................................................................................. viii
DAFTAR GAMBAR ................................................................................................... x
DAFTAR TABEL ......................................................................................................... xiii
DAFTAR LAMPIRAN ............................................................................................... xv

BAB

I. PENDAHULUAN .................................................................................................... 1
   1.1. Latar Belakang ................................................................................................. 1
   1.2. Tujuan Penelitian ............................................................................................ 2
   1.3. Rumusan Masalah ........................................................................................... 2
   1.4. Batasan Masalah ............................................................................................. 3
   1.5. Metode Penelitian .......................................................................................... 3
   1.6. Diagram Alir Penelitian ................................................................................. 4
   1.7. Manfaat Penelitian ......................................................................................... 4

II. TINJAUAN UMUM ............................................................................................... 6
   2.1. Kesampaian Daerah ......................................................................................... 6
   2.2. Keadaan Geologi ............................................................................................. 6
   2.3. Iklim dan Curah Hujan ............................................................................... 11
   2.4. Penambangan .............................................................................................. 11

III. DASAR TEORI .................................................................................................. 14
   3.1. Batuan ............................................................................................................ 14
   3.2. Klasifikasi Massa Batuan ............................................................................. 14
   3.3. Pengujian Laboratorium ................................................................................ 24
   3.4. Metode Elemen Hingga ............................................................................... 29
   3.5. Tegangan Insitu dan Tegangan Terinduksi .................................................... 31
   3.6. Kriteria Keruntuhan Mohr-Coulomb ........................................................... 33
   3.7. Strength Factor ....................................................................................... 34
   3.8. Displacement/Perpindahan ........................................................................... 35
   3.9. Kegempaan ................................................................................................... 37
   3.10. Ketidakpastian dalam Rekayasa Geoteknik ................................................. 38
3.11. Teori Probabilitas .......................................................... 41
3.12. Point Estimate Method .................................................... 45
3.13. Geowisata ................................................................. 46

IV. HASIL PENELITIAN .......................................................... 48
4.1. Hasil Penelitian Lapangan .................................................. 48
4.2. Hasil Pengujian Laboratorium ........................................... 48
4.3. Klasifikasi Massa Batuan Berdasarkan Rock Mass Rating .... 58
4.4. Analisis Terowongan ....................................................... 59

V. PEMBAHASAN ............................................................... 66
5.1. Analisis Kestabilan Terowongan ........................................... 66
5.2. Pengaruh Probabilistik Terhadap Kestabilan Terowongan ...... 77

VI. KESIMPULAN DAN SARAN ............................................. 90
6.1. Kesimpulan ..................................................................... 90
6.2. Saran ............................................................................. 90
