ABSTRACT ....................................................................................................................... xvi

BAB I PENDAHULUAN ..................................................................................................... 1
1.1. Latar Belakang .......................................................................................................... 1
1.1.1. Perumusan Masalah ............................................................................................ 2
1.1.2. Keaslian Penelitian .............................................................................................. 3
1.2. Maksud, Tujuan dan Manfaat Penelitian ................................................................. 6
1.2.1. Maksud Penelitian .............................................................................................. 6
1.2.2. Tujuan Penelitian ............................................................................................... 6
1.2.3. Manfaat Penelitian ............................................................................................. 6
1.3. Peraturan Perundang-Undangan ............................................................................ 7
1.4. Tinjauan Pustaka ..................................................................................................... 8
1.4.1. Kualitas Air Laut ............................................................................................... 8
1.4.2. Wilayah Pesisir .................................................................................................. 12
1.4.3. Sumber Pencemar di Laut ............................................................................... 14
1.4.3.1. Kegiatan Usaha Minyak dan Gas Bumi ......................................................... 14
1.4.3.2. Kegiatan Domestik ....................................................................................... 17
1.4.3.3. Kegiatan Pariwisata ..................................................................................... 20
1.4.3.4. Kegiatan Dermaga ....................................................................................... 20
1.4.4. Pengaruh Tumpahan Minyak di Perairan .......................................................... 21
1.4.5. Indeks Pencemaran ......................................................................................... 22
1.4.6. Baku Mutu Air Laut ....................................................................................... 24
1.4.7. Instalasi Pengolahan Air Limbah (IPAL) .......................................................... 28
1.5. Lingkup Daerah Penelitian .................................................................................. 29
1.5.1. Lokasi, Letak, Luas, dan Kesampaian Daerah Penelitian .............................. 29
1.5.1.1. Lokasi, Letak, dan Luas Daerah Penelitian .................................................... 29
1.5.1.2. Kesampaian Lokasi Penelitian ....................................................................... 29
1.5.2. Batas Daerah Penelitian .................................................................................. 30
1.5.2.1. Batas Permasalahan Penelitian ....................................................................... 30
1.5.2.2. Batas Ekologis .............................................................................................. 30
1.5.2.3. Batas Sosial ................................................................................................. 31

BAB II RUANG LINGKUP PENELITIAN ................................................................. 35
2.1. Lingkup Kegiatan Penelitian .............................................................................. 35
2.1.1. Karakteristik Kegiatan Penelitian ..................................................................... 36
2.1.2. Komponen Lingkungan Terdampak ................................................................ 37
2.2. Kriteria, Indikator dan Asumsi Objek Penelitian .............................................. 38

BAB III CARA PENELITIAN .................................................................................. 42
3.1. Jenis Metode Penelitian dan Parameter yang Digunakan ................................. 42
3.1.1. Metode Survey ............................................................................................... 42
3.1.2. Metode Wawancara ...................................................................................... 43
3.1.3. Metode Indeks Pencemaran ........................................................................... 43
3.1.4. Metode Pengharkatan (Scoring) ..................................................................... 44
3.1.5. Metode Analisis Data .................................................................................... 45
3.2. Teknik Sampling dan Penentuan Lokasi Sampling .......................................... 45
3.3. Perlengkapan Penelitian ................................................................................... 46
3.4. Tahapan Penelitian ........................................................................................... 47
3.4.1. Tahap Persiapan ............................................................................................. 49
3.4.1.1. Studi Literatur ............................................................................................. 49
3.4.1.2. Administrasi dan Perijinan Penelitian .......................................................... 49
3.4.1.3. Pengumpulan data sekunder ........................................................................ 49
3.4.1.4. Observasi Lapangan .................................................................................... 50
3.4.1.5. Pembuatan Peta Tentatif ............................................................................ 51
3.4.2. Tahap Kerja Lapangan .................................................................................... 51
3.4.2.1. Pemetaan Penggunaan Lahan ..................................................................... 51
3.4.2.2. Pengukuran Arus Laut ............................................................................... 52
3.4.2.3. Pengukuran Gelombang ............................................................................. 53
3.4.2.4. Pengukuran Pasang-surut .......................................................................... 54
3.4.2.5. Pengambilan Sampel Air Laut ..................................................................... 55
3.4.3. Tahap Kerja Laboratorium .............................................................................. 57
3.4.4. Tahap Kerja Studio .......................................................................................... 57
3.4.4.1. Kerja untuk Sajian pada Rona Lingkungan ............................................... 57
3.4.4.2. Kerja untuk Sajian Evaluasi Hasil Penelitian ............................................. 58
3.4.4.3. Metode Penentuan Lokasi IPAL ................................................................. 60
3.4.5. Tahap Pasca Lapangan .................................................................................... 62
3.4.5.1. Kerja Untuk Sajian Arahan Pengelolaan .................................................... 62

BAB IV RONA LINGKUNGAN HIDUP ................................................................. 66
4.1. Komponen Geofisik-Kimia ................................................................................ 66
4.1.1. Iklim .............................................................................................................. 66
4.1.2. Bentuklahan .................................................................................................. 70
4.1.3. Satuan Batuan ............................................................................................... 71
4.1.4. Kondisi Tata Air ............................................................................................ 74
4.2. Komponen Lingkungan Biotis .......................................................................... 80
4.2.1. Flora ............................................................................................................. 80
4.2.2. Fauna ........................................................................................................... 81
4.3. Komponen Sosial ............................................................................................. 83
4.3.1. Demografi ..................................................................................................... 83
4.3.2. Ekonomi ......................................................................................................... 83
4.3.3. Sosial Budaya ............................................................................................... 85
4.3.4. Komponen Kesehatan Masyarakat ................................................................. 87
4.3.5. Penggunaan Lahan ........................................................................................ 88

BAB V EVALUASI HASIL PENELITIAN ................................................................. 91
5.1. Analisis Indeks Pencemaran ............................................................................. 91
5.1.1. Lokasi Sekitar Dermaga (LP 1) ..................................................................... 93
5.1.2. Lokasi Sekitar Permukiman (LP 2) ............................................................... 93
5.1.3. Lokasi Sekitar Pantai Bintang (LP 3) ............................................................. 94
5.1.4. Lokasi Sekitar Kawasan Konservasi (LP 4) .................................................... 95
5.1.5. Lokasi Sekitar Pantai Perawan (LP 5) ............................................................ 95
5.1.6. Lokasi Bagian Timur Pulau Pari (LP 6) ......................................................... 96
5.1.7. Lokasi Sekitar Permukiman (LP 7) ............................................................... 96
5.2. Faktor yang Mempengaruhi Indeks Pencemaran ............................................ 99
5.2.1. Gelombang .................................................................................................... 99
5.2.2. Pasang-Surut ................................................................................................ 100
5.2.3. Arus Laut ...................................................................................................... 101
5.2.4. Korelasi Faktor-Faktor Penyebab Tingkatan Indeks Pencemaran .............. 102
5.3. Evaluasi Penentuan Lokasi IPAL .................................................................... 104
5.3.1. Penduduk ...................................................................................................... 104
5.3.2. Jarak .............................................................................................................. 105
5.3.3. Kemiringan Lahan ....................................................................................... 105
5.3.4. Jenis Tanah .................................................................................................. 106
5.3.5. Tata Guna Lahan ........................................................................................ 106
5.3.6. Badan Air Penerima ................................................................................... 106
5.3.7. Bahaya Banjir ............................................................................................. 107
5.3.8. Batas Administrasi ...................................................................................... 107

BAB VI ARAHAN PENGELOLAAN ......................................................................... 112
6.1. Pendekatan Teknologi ..................................................................................... 112
6.1.1. Arahana Pengelolaan Limbah Domestik ..................................................... 112
6.1.2. Arahana Pengelolaan Limbah Non Domestik ............................................. 118
6.2. Pendekatan Sosial Ekonomi ................................................................. 119
6.3. Pendekatan Institusi ........................................................................ 120

BAB VII KESIMPULAN DAN SARAN .................................................. 122

7.1. Kesimpulan .......................................................................................... 122
7.2. Saran .................................................................................................... 123
