ABSTRACT

This writing aims to determine the effect of Work Family Conflict on Teacher Performance mediated by Job Stress. Work family conflict is one of the conflicts that often occurs among teachers, because they have to divide their time for work and family matters. Work family conflict will affect teacher performance. If teacher performance decreases it will have an impact on teaching and learning activities in schools. This research was conducted at Muhammadiyah Condong Catur Elementary School, Depok District, Sleman Regency, Yogyakarta. The number of respondents studied was 51 teachers with a purposive sampling method. Data were collected by distributing questionnaires and using simple regression and path analysis as analysis techniques. The sobel test was also used to find out if there was mediation in this study. The results of this analysis show the results, namely: 1) Work family conflict has a negative effect on teacher performance. 2) Work family conflict has a positive effect on work stress. 3) Job stress has a negative effect on teacher performance. 4) Job stress cannot mediate work family conflict on teacher performance.

Keywords: Work family conflict. Work stress. Teacher Performance.
