

ABSTRACT

This study aims to examine the effect of independence, experience, competence, leadership style, and workload of auditors on the auditor's professional skepticism on the Auditor at the Public Accountant Office in Yogyakarta. The sample in this study were auditors who had worked for at least 1 year. The sampling method in this study is the convenience sampling method. The number of samples used was 39 respondents who were Auditors at the Public Accountant Office in the Yogyakarta Region. The data were analyzed using double linear regression.

The results of this study indicate that auditor independence influences professional auditor skepticism. The auditor's experience influences the auditor's professional skepticism. Auditor competence influences professional auditor skepticism. Leadership style influences auditor professional skepticism. While the workload does not affect the auditor's professional skepticism.

Keywords: independence, experience, competence, leadership style, workload
