

## **ABSTRACT**

*This study aims to: (1) analyze the effect of PDRB on the Open Unemployment Rate in DKI Jakarta in 2010-2019, (2) analyze the effect of the Provincial Minimum Wage (UMP) on the Open Unemployment Rate in DKI Jakarta in 2010-2019, (3) analyze the influence of the Growth of the Human Development Index on the Open Unemployment Rate in DKI Jakarta in 2010-2019. This research is based on secondary data; namely data on PDRB, Increase in UMP, and Growth in HDI. This research uses Panel Data Regression analysis tool. Based on the results of this study, it is known that PDRB, Provincial Minimum Wage (UMP), Human Development Index Growth are equally influential and significant on the Unemployment Rate in DKI Jakarta. The PDRB variable has a negative and significant effect on the open unemployment rate in DKI Jakarta. This shows that the greater the PDRB, the lower the unemployment rate. The Provincial Minimum Wage (UMP) variable has a negative and significant effect on the open unemployment rate in DKI Jakarta. This shows that the greater the value of the Provincial Minimum Wage (UMP), the lower the unemployment rate. The Human Development Index (HDI) variable has a negative and significant effect on the open unemployment rate in DKI Jakarta. This shows that the greater the value of the Human Development Index (HDI), the lower the unemployment rate.*
