

ABSTRACT

This study aims to analyze the effect of Regional Original Income, General Allocation Funds, Special Allocation Funds, and Revenue Sharing Funds on the Human Development Index in the Regency/City of West Java Province in 2016-2020. This research is based on secondary data, namely Regional Original Income, General Allocation Funds, Special Allocation Funds, and Profit Sharing Funds available at the Directorate General of Fiscal Balance in 2016-2020 and the Human Development Index available at the Central Statistics Agency in 2016-2020. . The analytical tool used is Panel Data Regression. Based on the results of the analysis, it is known that the Regional Original Revenue and Special Allocation Fund variables have an influence on the Human Development Index, while the General Allocation Fund and Revenue Sharing Fund variables have no effect on the Human Development Index.

Keywords : *Regional Original Revenue, General Allocation Fund, Special Allocation Fund, Revenue Sharing Fund, and Human Development Index.*
