

## INTISARI

Penelitian ini memiliki tujuan untuk menganalisis pengaruh Indeks Ketahanan Sosial (IKS), Indeks Ketahanan Ekonomi (IKE), Indeks Ketahanan Lingkungan (IKL), dan Indeks Kesulitan Geografis (IKG) terhadap Produk Domestik Regional Bruto level Desa (PDRB Desa) dan Mengklasifikasikan status Desa menurut IDM di Kabupaten Gunungkidul Tahun 2019. Data dalam penelitian berjenis data *cross-section* di 144 Desa Kabupaten Gunungkidul Tahun 2019 dan menggunakan data sekunder yaitu data IKS, IKE, IKL, dan IKG dan data hasil *proxy* yaitu PDRB Desa. Jenis penelitian adalah deskriptif kuantitatif. Alat analisis yang digunakan adalah regresi berganda dan statistik deskriptif (rata-rata). Hasil penelitian menunjukkan bahwa IKS berpengaruh positif signifikan terhadap PDRB Desa, IKE dan IKL tidak berpengaruh terhadap PDRB Desa, IKG berpengaruh negatif dan signifikan terhadap PDRB Desa. Pada Kabupaten Gunungkidul tidak terdapat Desa Tertinggal maupun Desa Sangat Tertinggal, melainkan terdapat sebanyak 42 Desa berstatus Desa Berkembang; sebanyak 88 Desa berstatus Desa Maju; dan sebanyak 14 Desa berstatus sebagai Desa Mandiri.

**Kata Kunci:** Klasifikasi status Desa, Indeks Desa Membangun, Indeks Ketahanan Sosial, Indeks Ketahanan Ekonomi, Indeks Ketahanan Lingkungan, Indeks Kesulitan Geografis, PDRB Desa.

## **ABSTRACT**

*This study aims to analyze the effect of the Social Resilience Index (IKS), Economic Resilience Index (IKE), Environmental Resilience Index (IKL), and Geographical Difficulty Index (IKG) on Gross Regional Domestic Product at Village level (Village GRDP) and classifying village status according to the IDM in Gunungkidul Regency in 2019. The data in the study were cross-sectional data in 144 villages in Gunungkidul Regency in 2019 and used secondary data, namely IKS, IKE, IKL, and IKG data and proxy data, namely Village GRDP. This type of research is descriptive quantitative. The analytical tools used are multiple regression and descriptive statistics (average). The results showed that IKS had a significant positive effect on Village GRDP, IKE and IKL had no effect on Village GRDP, IKG had a negative and significant effect on Village GRDP. In Gunungkidul Regency, there are no Disadvantaged Villages or Very Disadvantaged Villages, but there are as many as 42 Villages with the status of Developing Villages; as many as 88 Villages with Advanced Village status; and as many as 14 villages have the status as Independent Villages.*

*Keywords: Classification of Village status, Village Building Index, Social Resilience Index, Economic Resilience Index, Environmental Resilience Index, Geographic Difficulty Index, Village GRDP.*
