ABSTRAK

Tujuan penelitian 1) Mengevaluasi perencanaan dan pelaksanaan kegiatan mina timun oleh Poktan Ngudi Marem kepada masyarakat Dusun Samberembe 2) Mengkaji efektifitas dan efisiensi kegiatan mina timun di Dusun Samberembe. Penelitian menggunakan metode kualitatif. Teknik penentuan informan menggunakan teknik penelitian *konteks, input, process, output* atau *CIPP*. Informan dalam penelitian ini dipilih menggunakan teknis *snowball* yakni Ketua Kelompok Tani Ngudi Marem yakni Bapak Satriyanta, Ketua Pokdarwis Kampung Mina Padi yakni Bapak Ricky Wahid Syam, dan, Anggota Poktan Ngudi Marem yang telah menerapkan mina timun yakni Bapak Basuki Rahmat. Sumber data yang diambil yakni data primer dan sekunder. Teknik pengumpulan data yakni menggunakan wawancara, observasi, dan dokumentasi. Pengujian keabsahan data yakni menggunakan triangulasi waktu dan triangulasi sumber. Teknik analisis data menggunakan cara reduksi data, penyajian data, dan penarikan kesimpulan. Hasil penelitian ini 1 Dalam perencanaan dan pelaksanaan kegiatan mina timun, menggunakan: konteks meliputi program, uji coba, anggaran dan saran. Input meliputi sumberdaya, sarana prasarana, modal, dan prosedur. Proses meliputi proses dan staf. Produk meliputi tujuan, dampak, pencapaian, perbaikan dan evaluasi. 2 Kegiatan mina timun yang sedang berada dalam tahap pengembangan yang sangat efektif untuk diterapkan di Dusun Samberembe, karena perawatan yang mudah, dan hasil yang lebih banyak daripada budidaya timun konvensional. Dapat disimpulkan bahwa kegiatan mina timun Dusun Samberembe berjalan secara efektif dan efisien, akan tetapi masih perlu dikembangkan lebih lanjut untuk mendapatkan *standard operational procedure* atau *SOP* yang sesuai.

Kata kunci: Perencanaan kegiatan, pelaksanaan kegiatan, dan evaluasi kegiatan.

**EVALUATION OF MINA TIMUN ACTIVITIES IN SAMBEREMBE

ABSTRACT

Research objectives 1) To evaluate the planning and implementation of mina cucumber activities by Poktan Ngudi Marem to the people of Samberembe Hamlet 2) To examine the effectiveness and efficiency of mina cucumber activities in Samberembe Hamlet. The research uses qualitative methods. technique of determining informants uses *context, input, process, output* or *CIPP research techniques*. The informants in this study were selected using *snowball* namely the Chair of the Ngudi Marem Farmers Group, namely Mr. Satriyanta, the Head of the Mina Padi Village Pokdarwis namely Mr. Ricky Wahid Syam, and, a member of the Ngudi Marem Poktan who had implemented mina cucumber, namely Mr. Basuki Rahmat. Sources of data taken are primary and secondary data. Data collection techniques using interviews, observation, and documentation. Testing the validity of the data using time triangulation and source triangulation. The data analysis technique uses data reduction, data presentation, and drawing conclusions. The results of this study 1 In planning and implementing mina cucumber activities, using: context includes programs, trials, budgets and suggestions. Inputs include resources, infrastructure, funds, and procedures. Process includes process and staff. Products include goals, impact, achievement, improvement and evaluation. 2 The mina cucumber activity which is currently under development is very effective to be implemented in Samberembe Hamlet, because of its easy maintenance and higher yields than conventional cucumber cultivation. It can be concluded that the mina cucumber activity in Samberembe Hamlet is running effectively and efficiently, but it still needs to be developed further to obtain *standard operating procedure* or *SOP* .

Keywords: activity planning, activity implementation, and activity evaluation
