ABSTRACT

This study aims to analyze the effect of Inflation, Gross Domestic Product, and Composite Stock Price Index on Islamic Banking Third Party Funds in 2013.I-2020.IV. This research is a quantitative study based on secondary data in 2013.I-2020.IV, namely Inflation, Gross Domestic Product, Composite Stock Price Index, and Islamic Banking Third Party Funds which are available on the official website of Bank Indonesia, the Central Statistics Agency, the Stock Exchange. Indonesian Securities, and the Financial Services Authority. The analytical tool used in this study is multiple linear regression/Ordinary Least Square using time series data. Based on the results of the analysis that has been carried out, it is known that the Inflation variable has a significant negative effect, the Gross Domestic Product variable has a significant positive effect, and the Composite Stock Price Index variable has no effect on the Third Party Fund variable for Indonesian Islamic Banking.
