RINGKASAN .................................................................................................................. v

ABSTRACT ....................................................................................................................... vi

KATA PENGANTAR ........................................................................................................ vii

DAFTAR ISI ..................................................................................................................... viii

DAFTAR GAMBAR .......................................................................................................... x

DAFTAR TABEL .............................................................................................................. xii

DAFTAR LAMPIRAN .................................................................................................... xiii

BAB

I PENDAHULUAN

1.1. Latar Belakang ........................................................................................................... 1

1.2. Rumusan Masalah .................................................................................................... 1

1.3. Tujuan Penelitian .................................................................................................... 2

1.4. Batasan Masalah ....................................................................................................... 2

1.5. Metode Penelitian .................................................................................................... 2

1.6. Manfaat Penelitian .................................................................................................. 4

1.7. Diagram Alir Penyusunan Laporan ......................................................................... 5

II TINJAUAN UMUM

2.1. Lokasi dan Kesampaian Daerah ............................................................................. 6

2.2. Iklim dan Curah Hujan .......................................................................................... 7

2.3. Tinjauan Geologi ..................................................................................................... 8

2.4. Tahapan Penambangan .......................................................................................... 10

III DASAR TEORI

3.1. Sifat Fisik Material .................................................................................................. 15

3.2. Faktor Pengisian Mangkuk (Bucket Fill Factor) .................................................. 16

3.3. Geometri Jalan Angkut .......................................................................................... 17

3.4. Pola Pemuatan ....................................................................................................... 19

3.5. Waktu Edar (Cycle Time) ..................................................................................... 21

3.6. Efisiensi Kerja ........................................................................................................ 22

3.7. Produktivitas Alat Mekanis .................................................................................. 24

3.8. Faktor Keserasian (Match Factor) ......................................................................... 25
IV HASIL PENELITIAN

4.1. Tinjauan Lokasi Penelitian .................................................................28
4.2. Faktor Pengembangan (Swell Factor) ........................................32
4.3. Faktor Pengisian Bucket (Bucket Fill Factor) ..........................33
4.4. Waktu Edar (Cycle Time) .................................................................33
4.5. Efisiensi Kerja .................................................................................33
4.6. Kemampuan Produksi Alat Muat dan Alat Angkut ....................35
4.7. Faktor Keserasian (Match Factor) ..................................................35

V PEMBAHASAN

5.1. Kemampuan Produksi Alat Muat dan Alat Angkut ....................36
5.2. Analisis Penyebab Tidak Tercapainya Target Produksi ..............37
5.3. Upaya Peningkatan Produksi Alat Muat dan Alat Angkut ..........39

VI KESIMPULAN DAN SARAN

6.1. Kesimpulan ....................................................................................42
6.2. Saran .............................................................................................43
