ABSTRACT

This study aims to (1) Assess the empowerment process of the food crop cultivation training program (2) Assess the supporting factors and inhibiting factors of the food crop cultivation training program. This study used a qualitative approach and took informants using oral data sources and written data sources, namely, research supporting informants Head of the Ora Et Labora farmer group, key informants agricultural extension officers, and key informants 2 active members of the Ora Et Labora Farmer Group. Data collection techniques used are observation, interviews, and documentation, with the validity of the source triangulation data. Data analysis using data reduction, data presentation, and conclusion. The results showed that (1) The process of empowering the food crop cultivation training program went through 3 stages: Awareness was carried out by socialization, the Capacity Building stage was given training, vision and mission development and AD ART were made, and the Empowerment stage was given capacity building but had not been successful. (2) Supporting factors, namely obtaining corn seeds from the government which is channeled through BPP Maesaan District, borrowing tractor equipment from the Agriculture Service and funds from farmer group cash, and inhibiting factors, namely training carried out through social media in the form of YouTube, so that members of farmer groups do not understand.
