

ABSTRACT

This research presents a research design consisting of the type of research (quantitative), the type of data (secondary) used, data collection procedures through collecting documents related to the APBD, RPJMD, and other required documents. The type of research used is descriptive research and is a case study where the discussion refers to quantitative data. Here the financial condition of East Lombok district is explained. Apart from that, the strength of efficiency and effectiveness of regional financial management in East Lombok Regency was quantitatively calculated. The unit of analysis in this research is East Lombok Regency Regional Financial Management from 2016 to 2019. The data used is secondary data obtained from the website of the East Lombok Regency Central Statistics Agency, East Lombok Bappeda, and other supporting sources that provide the required data regarding the finances of East Lombok Regency. Data collection was carried out using library techniques or documentation from annual reports in the 2016-2019 period. Online observations on the availability of secondary data are needed in financial management reports in the form of APBD and/or annual RPMJD or GRDP. Next, these data are downloaded for selection purposes based on criteria. Then, a selection of data is made that is appropriate for the composition of each variable used.

Keywords: Regional Revenue and Expenditure Budget (APBD), Regional Revenue, Regional Original Income, Regional Expenditures, Total Regional Revenue

MOTTO

“Tidak ada kata terlambat dalam mengerjakan sesuatu, yang penting sudah berusaha dan berdo’a serta pasrahkan hasilnya kepada sang Pencipta”

“Usaha tanpa do’a itu sia-sia, sama artinya dengan sholat tanpa berwudhu”
