

ABSTRAK

Penelitian ini membahas perkembangan kerjasama keamanan maritim antara Indonesia dan Jepang melalui Indonesia Japan Maritime Forum (IJMF) pada periode 2016-2024. IJMF merupakan platform strategis yang dirancang untuk memperkuat hubungan bilateral kedua negara dalam menghadapi tantangan keamanan maritim di kawasan Asia Pasifik. Penelitian ini bertujuan untuk menganalisis dinamika kerjasama kedua negara, mengidentifikasi faktor-faktor yang mendorong dan menghambat pelaksanaannya, serta mengevaluasi dampaknya terhadap stabilitas maritim regional. Metode penelitian yang digunakan adalah deskriptif kualitatif, data yang diperoleh berupa informasi dari sumber-sumber seperti jurnal ilmiah, buku, artikel, serta sumber-sumber terpercaya lainnya. Hasil penelitian menunjukkan bahwa kerjasama melalui IJMF telah berkembang secara signifikan, terutama dalam bidang penegakan hukum di laut, peningkatan kapasitas personel, dan penguatan teknologi maritim. Faktor seperti kesamaan kepentingan strategis, komitmen politik yang kuat, dan tantangan keamanan maritim global, seperti ancaman perompakan dan perdagangan ilegal, menjadi pendorong utama kerjasama ini. Namun, terdapat pula tantangan berupa perbedaan prioritas nasional dan keterbatasan sumber daya yang memengaruhi efektivitas pelaksanaan program.

Kata kunci: *kerjasama maritim, Indonesia Japan Maritime Forum, keamanan maritim, hubungan Indonesia-Jepang.*

ABSTRACT

This research discusses the development of maritime security cooperation between Indonesia and Japan through the Indonesia Japan Maritime Forum (IJMF) during the period 2016-2024. IJMF is a strategic platform designed to strengthen the bilateral relationship between the two countries in addressing maritime security challenges in the Asia-Pacific region. This research aims to analyze the dynamics of cooperation between the two countries, identify the factors that drive and hinder its implementation, and evaluate its impact on regional maritime stability. The research method used is descriptive qualitative, with data obtained from sources such as scientific journals, books, articles, and other reliable sources. The research results show that cooperation through the IJMF has developed significantly, especially in the fields of maritime law enforcement, personnel capacity building, and strengthening maritime technology. Factors such as shared strategic interests, strong political commitment, and global maritime security challenges, such as piracy and illegal trade threats, are the main drivers of this cooperation. However, there are also challenges in the form of differing national priorities and resource limitations that affect the effectiveness of program implementation.

Keywords: Maritime cooperation, Indonesia Japan Maritime Forum, maritime security, Indonesia-Japan relations.
