ABSTRACT

This study aims to examine the CSR Inclusive Coffee Program activities of Tamiang Creative House PT. Pertamina Exploration and Production and to examine the empowerment process of people with disabilities in Aceh Tamiang Regency through the Corporate Social Responsibility (CSR) program "Inklusi Coffee" by PT. Pertamina Exploration and Production. (1) An inclusive Coffee activity initiated by PT. Pertamina Exploration and Production that empowers people with disabilities to develop themselves and their creativity through Coffee shop businesses. This study uses a qualitative approach with a case study method. Data collection was carried out through interviews, observations, and documentation with informants selected by purposive sampling. (2) The results of the study show that the empowerment process goes through three fundamental stages: awareness, capacity building, and empowerment. The awareness stage is carried out through Focus Group Discussions (FGD) to build self-confidence. The capacity building stage includes F&B technical training, business management, and the provision of disability-friendly and sustainable infrastructure such as Solar Power Plants (PLTS). The empowerment stage is realized by gradually handing over the authority to manage the cafe to disabled workers to encourage independence. The program has succeeded in significantly improving the economic conditions of participants with incomes above the minimum wage, as well as increasing their self-confidence and social integration, turning Inklusi Coffee into a successful empowerment model. The results of this study also present a comparison of the socio-economic conditions of people with disabilities before and after the Inklusi Coffee business activity.
