ABSTRACT

The agricultural sector played an important role in the economy of Grobogan Regency. This study aims to: 1) Analyze the forward and backward linkages of the Agriculture, Forestry, and Fisheries Sector in the economy of Grobogan Regency, 2) Analyze the contribution value of the Agriculture, Forestry, and Fisheries Sector to the Gross Regional Domestic Product (GRDP) of Grobogan Regency, and 3) Analyze the forecast of the contribution of the Agriculture, Forestry, and Fisheries Sector in the economy of Grobogan Regency for the years 2024–2028. The research used a quantitative approach with a purposive type of research. The data collection method was documentation study. The data sources used secondary data from the Central Java BPS and the Grobogan Regency BPS. The quantitative data included the input-output table of Central Java Province, which was updated to the Grobogan Regency Input-Output Table for 2023 using the RAS method, and GRDP data for the 2019–2023 period of Grobogan Regency. The results of the study were 1) The Agriculture, Forestry, and Fisheries Sector had a higher dependency compared to its driving power on other sectors, 2) The Agriculture, Forestry, and Fisheries Sector had a high and more progressive contribution in supporting the economy of Grobogan Regency, 3) The trend of the contribution of the Agriculture, Forestry, and Fisheries sectors in Grobogan Regency shows a downward trend from 2024-2028, meaning a decrease in the role of the Agriculture, Forestry, and Fisheries sectors in the regional economic structure in 2024-2028.
