## BAB I. PENDAHULUAN ................................. 1

1.1. Latar Belakang .................................................. 1
1.2. Permasalahan .................................................. 2
1.3. Maksud dan Tujuan .................................................. 2
1.4. Metodologi ..................................................
   1.4.1. Pengumpulan Data ..................................... 3
   1.4.2. Evaluasi Trajectory Pemboran Berarah ............. 5
1.5. Sistematika Penulisan ..................................... 5

## BAB II. TINJAUAN UMUM LAPANGAN .................... 7

2.1. Sejarah Singkat JOB – Pertamina – Petrochina East Java ...... 7
2.2. Letak Geografis Lapangan dan Sejarah Lapangan Y ............ 8
2.3. Kondisi geologi Lapangan Y .................................. 9
   2.3.1 Formasi Lidah ............................................. 10
   2.3.2. Formasi Mundu .......................................... 11
   2.3.3. Formasi Ledok .......................................... 11
   2.3.4. Formasi Wonocolo.................................... 12
   2.3.5. Formasi Ngrayong .................................... 12
   2.3.6. Formasi Tuban .......................................... 14
2.4. Geofisika Lapangan Y ...................................... 17
BAB III. TEORI DASAR PEMBORAN BERARAH ......................... 20

3.1. Tujuan dan Alasan Dilakukannya Pemboran Berarah .......... 22
    3.1.1. Tujuan Dilakukan Pemboran Berarah ...................... 22
    3.1.2. Alasan Dilakukan Pemboran Berarah ..................... 23
3.2. Tipe Pemboran Berarah ........................................... 27
3.3. Perencanaan Lintasan (Trajectory) Pemboran Berarah .......... 28
3.4. Penentuan Titik Bor Sumur Minyak ................................ 29
3.5. Perencanaan Trajectory Directional Drilling .................... 32
    3.5.1. Perencanaan Trajectory Vertikal & Horizontal Section. 32
    3.5.2. Penentuan Kick Off Point ................................... 35
    3.5.3. Penentuan Radius Pembelokan dan Sudut Inklinasi .... 36
        3.5.3.1. Penentuan Radius Pembelokan ........................ 36
        3.5.3.2. Penentuan Sudut Inklinasi ............................ 37
        3.5.3.3. Penentuan Build-up Section ........................... 38
        3.5.3.4. Penentuan Tangent Section ............................ 38
        3.5.3.5. Penentuan Jarak Terukur (Measured Depth) .... 39
3.6. Pengarah Lubang Bor ............................................... 40
    3.6.1. Metode Stokenbury .......................................... 40
    3.6.2. Metode Orientasi Dasar Lubang .................. 41
3.7. Peralatan Pembelok Lubang ...................................... 42
    3.7.1. Jet Bit ..................................................... 42
    3.7.2. Knuckle Joint .............................................. 45
    3.7.3. Whipstock .................................................. 46
    3.7.4. Adjustable Kick-Off (AKO) Sub ........................... 49
    3.7.5. Positive Displacement Motors (PDM) ........................ 51
    3.7.6. Rotary Steerable System (RSS) ............................. 54
3.7.7. Peralatan Lainnya .............................................. 57
    3.7.7.1. Bent Sub ................................................. 57
    3.7.7.2. Non Magnetic Drill Collar ............................... 58
    3.7.7.3. Stabilizer ............................................... 58

## BAB. IV KAJIAN TRAJECTORY PEMBORAN BERARAH
SUMUR “X” DIRECTIONAL DRILLING LAPANGAN
"Y" JOB PERTAMINA – PETROCHINA EAST JAVA ....... 106

4.1. Perencanaan Trajectory Pemboran Berarah Sudut Inklinasi dan Azimuth Direction Sumur “X” 108

4.1.1 Perencanaan Manual Pemboran Berarah Sumur “X” 111

4.1.1.1. Penentuan Build-up Section 113

4.1.1.2. Penentuan Tangent Section 114

4.1.1.3. Penentuan Total Jarak (Measured Depth) 114

4.1.1.4. Perhitungan Data Survey Pemboran Berarah Sumur “X” 114

4.2. Pelaksanaan Trajectory Pemboran Sudut Inklinasi Dan Azimuth Direction Sumur “X” 118

4.3. Kajian Trajectory Pemboran Berarah terhadap Penyimpangan Sudut Inklinasi dan Azimuth Direction serta Penanggulangannya pada Sumur “X” 128
