OECD. (2023). *Who does what for active labour market policy?* .

Parliament, E. (2019). *of 9 June 2011 General provisions Article 1 1 . This Act sets out the rules and conditions for undertaking , carrying out , and discontinuing the activity in the field of: 1 ) Within the scope of its regulation , this Act implements the following legal instruments of the European Communities : geological development works ; extraction of minerals from deposits ; underground tankless storage of substances ; underground landfilling of waste ; underground carbon dioxide storage for the purpose of carrying out a demonstration project of carbon dioxide capture and storage . 2 . This Act also sets out : the requirements regarding protection of mineral deposits , underground waters and other environmental elements in connection with the pursuit of the activity referred to in paragraph 1 ; the principles of exercising supervision and control over the activity regulated by the Act . 3 . A demonstration project of carbon dioxide capture and storage shall be taken to mean a project consisting in capture , conveyance and underground carbon dioxide storage , meeting the criteria for demonstration projects as laid down in Commission Decision No . 2010 / 670 / EU of 3 November 2010 laying down criteria and measures for the financing of commercial demonstration projects that aim at the environmentally safe capture and geological storage of CO 2 as well as demonstration projects of innovative renewable energy technologies under the scheme for greenhouse gas emission allowance trading within the Community established by Directive 2003 / 87 / EC of the European Parliament and of the Council ( OJ L 290 , 6 . 11 . 2010 , p . 39 ) , which is implemented for the purpose of verifying : dioxide capture and storage in the scope of carbon dioxide emission safety of application of the technology of carbon dioxide capture and storage for human health and life and for the environment ; the need and grounds for admitting to application the technology of carbon dioxide capture and storage on an industrial scale . 4 . The conditions for carrying on and controlling the activity consisting in the conveyance of carbon dioxide for the purpose of its underground storage aimed at implementing a demonstration project of carbon dioxide capture and storage are laid down in the Act of 10 April 1997 – Energy Law ( Journal of Laws. 2006(163).*
