**ABSTRACT**

*This study aimed to analyze the effect of social capital, consisting of structural capital, relational capital, and cognitive capital, on sustainable performance, with supply chain resilience as a mediating variable, in craft MSMEs in Kasongan, Bantul Regency. This study employed a quantitative approach with a survey method involving 75 respondents selected through purposive sampling. Data were analyzed using PLS-SEM with SmartPLS 4. The results showed that structural capital and cognitive capital had a positive and significant effect on supply chain resilience, while relational capital did not have a significant effect. Supply chain resilience had a positive and significant effect on sustainable performance. In addition, supply chain resilience significantly mediated the effect of structural capital and cognitive capital on sustainable performance, but did not significantly mediate the effect of relational capital.*

**Keywords:** *social capital, structural capital, relational capital, cognitive capital, supply chain resilience, sustainable performance.*
