DAFTAR ISI

KATA PENGANTAR ........................................................................................................... vii
DAFTAR ISI .................................................................................................................... viii
DAFTAR GAMBAR ............................................................................................................ x
DAFTAR TABEL ................................................................................................................ xii
DAFTAR LAMPIRAN ......................................................................................................... xiv
BAB
I. PENDAHULUAN ............................................................................................................. 1
   1.1. Latar Belakang Masalah ....................................................................................... 1
   1.2. Tujuan Penelitian ............................................................................................... 2
   1.3. Rumusan Masalah ............................................................................................... 2
   1.4. Batasan Masalah ................................................................................................. 3
   1.5. Metode Penelitian ............................................................................................. 3
   1.6. Manfaat Penelitian ........................................................................................... 4
II. TINJAUAN UMUM ....................................................................................................... 7
   2.1. Lokasi dan Kesampaian Daerah .......................................................................... 7
   2.2. Iklim dan Curah Hujan Kabupaten Sleman ......................................................... 7
   2.3. Fisiografi Daerah Penelitian ............................................................................. 7
   2.4. Geologi Daerah Penelitian (Van Bemmelen, 1949) ......................................... 8
   2.5. Stratigrafi Daerah Penelitian ........................................................................... 9
   2.6. Kegiatan Penambangan .................................................................................... 12
III. DASAR TEORI ............................................................................................................ 14
   3.1. Batuan .............................................................................................................. 14
   3.2. Massa Batuan (Bienawski, 1989) ..................................................................... 15
   3.3. Klasifikasi Massa Batuan (Bienawski, 1989) ................................................... 15
   3.4. Kriteria Keruntuhan ......................................................................................... 22
   3.5. Metode Saptono ................................................................................................ 23
IV. HASIL PENELITIAN .................................................................................................... 31
   4.1. Uji Sayatan Tipis ............................................................................................... 31
   4.2. Uji Sifat Fisik .................................................................................................... 33
   4.3. Uji Ultrasonic Velocity ..................................................................................... 35
   4.4. Uji Kuat Tekan Uniaksial .................................................................................. 36
   4.5. Uji Kuat Tarik .................................................................................................... 41
   4.6. Uji Point Load Index ......................................................................................... 42
Halaman

4.7. Uji Geser Langsung................................................................. 43
4.9. Penentuan Nilai Kohesi (c) dan Sudut Gesek Dalam (ϕ)............ 52

V. PEMBAHASAN.............................................................................. 51

5.1. Karakteristik Massa Batuan ....................................................... 51
5.2. Potensi Longsor................................................................. 52
5.3. Stabilitas Lereng Batuan................................................... 52

VI. KESIMPULAN DAN SARAN............................................................ 58

6.1. Kesimpulan............................................................................ 58
6.2. Saran ................................................................................ 58

DAFTAR PUSTAKA............................................................................. 59
