IRA WAHYUNI. 2026. *The Role of the Agriculture, Forestry, and Fisheries Sector in the Regional Economy of Aceh Jaya Regency, Aceh Province. Supervised by* Budi Widayanto**.**

ABSTRACT

The agriculture, forestry, and fisheries sector was the largest contributing sector to the economy of Aceh Jaya Regency. This study aimed to analyze: (1) the contribution of the agriculture, forestry, and fisheries sector to the economy of Aceh Jaya Regency; (2) the agriculture, forestry, and fisheries sector as a base sector; and (3) the growth and competitiveness of the agriculture, forestry, and fisheries sector in Aceh Jaya Regency during the 2020-2024 period. This study employed a quantitative approach with a descriptive research design and selected the research location using a purposive method. The data consisted of secondary data on Gross Regional Domestic Product (GRDP) at constant 2010 prices obtained from the Statistics Indonesia of Aceh Jaya Regency and Aceh Province. The analytical methods included contribution analysis, Location Quotient (LQ), and Shift Share analysis. The results showed that: (1) the agriculture, forestry, and fisheries sector made the largest contribution to the Gross Regional Domestic Product (GRDP) of Aceh Jaya Regency, with an average contribution of 30.18 percent during the study period; (2) the average Location Quotient (LQ) value of 1.076 indicated that the agriculture, forestry, and fisheries sector was a base sector; and (3) the Shift Share analysis indicated that the agriculture, forestry, and fisheries sector continued to grow, although its competitiveness remained relatively lower than that of the same sector at the Aceh Province level. The sector's growth was primarily influenced by the economic growth of Aceh Province, while its ability to generate competitive advantage still needed to be strengthened.

Keywords: *Agriculture, Forestry, and Fisheries Sector, Contribution, Location Quotient, Shift Share, Competitiveness.*

IRA WAHYUNI. 2026. *Peran Sektor Pertanian, Kehutanan, dan Perikanan dalam Perekonomian Wilayah Kabupaten Aceh Jaya Provinsi Aceh.* Di bawah bimbingan Budi Widayanto.

ABSTRAK

Sektor pertanian, kehutanan, dan perikanan merupakan sektor dengan kontribusi terbesar dalam perekonomian Kabupaten Aceh Jaya. Penelitian ini bertujuan untuk menganalisis: (1) kontribusi sektor pertanian, kehutanan, dan perikanan dalam perekonomian Kabupaten Aceh Jaya, (2) sektor pertanian, kehutanan, dan perikanan sebagai sektor basis, serta (3) pertumbuhan dan daya saing sektor pertanian, kehutanan, dan perikanan di Kabupaten Aceh Jaya selama periode 2020-2024. Penelitian ini menggunakan pendekatan kuantitatif dengan jenis penelitian deskriptif dan metode penentuan lokasi secara *purposive*. Data yang digunakan merupakan data sekunder berupa Produk Domestik Regional Bruto (PDRB) atas dasar harga konstan tahun 2010 yang diperoleh dari Badan Pusat Statistik Kabupaten Aceh Jaya dan Provinsi Aceh. Analisis yang digunakan meliputi analisis kontribusi, *Location Quotient* (LQ), dan *Shift Share*. Hasil penelitian menunjukkan bahwa: (1) sektor pertanian, kehutanan, dan perikanan memberikan kontribusi terbesar terhadap PDRB Kabupaten Aceh Jaya dengan rata-rata kontribusi sebesar 30,18 persen selama periode 2020-2024; (2) nilai rata-rata *Location Quotient* (LQ) sebesar 1,076 menunjukkan bahwa sektor pertanian, kehutanan, dan perikanan merupakan sektor basis, dan (3) hasil analisis *Shift Share* menunjukkan bahwa sektor pertanian, kehutanan, dan perikanan masih mengalami pertumbuhan, tetapi daya saing sektor tersebut relatif lebih rendah dibandingkan sektor yang sama pada tingkat Provinsi Aceh. Pertumbuhan sektor lebih banyak dipengaruhi oleh pertumbuhan ekonomi Provinsi Aceh, sedangkan kemampuan sektor dalam menciptakan keunggulan kompetitif masih perlu ditingkatkan.

Kata kunci: Kontribusi, *Location Quotient*, *Shift Share*, sektor pertanian, daya saing.
