

Abstract

In present time, global warming has grown into one of the most environment's phenomenon global issue. It becomes a multi-dimensional problem that related with economic, social, culture and environment aspect. Global Warming has attracted many attention. One of them is Nation Group of G8. The global warming issues become one of their major topic on the 33rd summit in German.

In their way to reach an agreement in the 33rd G8 summit about global warming, G8 face an obstacle. United States become the only G8 member that do not agree with the approach of global warming from The G8 Nation Group.
