ABSTRACT

Capital structure proxied by the ratio of total debt to book value of equity at the end of a particular company. The purpose of this study was to examine the influence of firm size, liquidity, profitability, asset structure and growth companies on capital structure, either jointly or partial. Analysis tools used in this study is the Multiple Regression Analysis to Test Assumptions Classical and performed with SPSS for Windows. Hypothesis testing is performed using the F test and t test. The results showed that the variables jointly affect the capital structure. Partial variable affecting the company's capital structure is the size and growth of the company, whereas no effect was variable liquidity, profitability and asset structure.

Keywords: Capital structure, firm size, liquidity, profitability, growth, and asset structure.
