

**THE INFLUENCE OF WORKING CAPITAL MANAGEMENT AND
CAPITAL STRUCTURE ON THE COMPANIES PROFITABILITY
(Study Empiris in Bursa Efek Inonesia 2004-2008 th)**

ABSTRACT

This research discusses about the influence of working capital management and capital structure on the companies profitability. Sample used in this research are the manufacturing companies in Idonesia wich is done with purposive sampling. Working capital management consists of three components, such as day in receivable, day in inventory, day in payables where each component can influence significantly. Capital structure is the comparison between debt total and asset total.
